Fourier Accessories and Cables

The Fourier philosophy is to ensure that as teachers you receive complete ready-to-use packs that answer your students' entire science exploration needs. That's why our accessories include any additional items to complete comprehensive data logging both in the Lab and the field:

- Long lasting, rechargeable batteries, so you don't need to supplement our packs with extra battery costs.
- Adaptors to other major sensor vendors such as Vernier so there is no need to replace your existing sensors. Just put them to work with our advanced data loggers and software.
- Fourier products don't just come in a box. Our unique, bright, zip up suitcases ensure our products stay protected and mobile.

So for sensor cables, adapter cables, AC/DC adapters, weather boxes, carrying cases in multiple sizes and colors and more, make Fourier your one-stop-shop.
